113, KARATTUR, NANJAIKOLLANALLI POST - PASUR VIA, ERODE - 638 154

## Career Objective

Motivated and detail-oriented Electronics and Communication Engineering student seeking an internship or entry-level opportunity in embedded systems and electronics. Building a strong foundation in C programming, digital electronics, microcontrollers, and embedded systems. Eager to apply classroom learning to real-world projects, learn new technologies, and contribute effectively to a professional engineering team.

## Technical Skills

| | |
|---|---|
| Programming | C, Embedded C, Python (Basics) |
| Core Electronics | Digital Electronics, Basic Circuit Analysis, Microcontrollers, Embedded Systems |
| Tools & Software | MS Office, GitHub, Basic Programming & Simulation Tools |
| Currently Learning | Embedded Systems, IoT, Microcontroller Programming |

## Relevant Coursework

Digital Logic Design | Electronic Devices | Circuit Analysis | Signals & Systems | Programming in C | Embedded Systems Fundamentals

## Internship Experience

**Techvolt — Intern | Embedded Systems**

- Successfully completed an internship focused on embedded systems and practical technical skill development.
- Gained hands-on exposure to embedded programming, microcontroller concepts, sensors, and basic hardware interfacing.
- Strengthened programming, problem-solving, teamwork, and practical engineering skills through assigned tasks and projects.

## Projects

**ECE Toolkit — GitHub Project**

- Developed an ECE-focused toolkit to provide useful resources and utilities for Electronics and Communication Engineering students.
- Organized the project as a practical digital resource for accessing ECE-related tools and information.
- Used GitHub to develop, maintain, and showcase the project.

**Four-Way Traffic Light System — Embedded Systems Project**

- Developed a traffic light control concept for managing signals across four directions.
- Applied embedded C programming and microcontroller-based control logic to implement sequential signal operation.
- Focused on real-time control and embedded system interfacing.

## Education

Bachelor of Engineering / Technology in Electronics and Communication Engineering (ECE)

2nd Year | Expected Graduation: 2029 | CGPA: 7.78

## Certifications

- Embedded Systems Internship Certificate — Techvolt
- C / Programming Fundamentals
- Technical Workshops & Academic Activities

## Soft Skills

Quick Learner | Problem Solving | Teamwork | Communication | Time Management | Adaptability | Willingness to Learn

## Languages

Tamil | English
